Solver Report

Playmaker rules engine · commit 2f66076 · generated 05 Nov 2026

Budgets: **2 and 10 minutes per card**, 5 seeds at the short budget (the full defaults). Coach's Call cards give each of the five targets its own budget. The evaluation looks over the offence's next two turns against the defence's best reply. Every value is **estimated** (guided search, evaluation at the leaves) unless marked exact; a card is **unstable** if its values spread by more than 2 points across its runs, or its first play changes between budgets.

Cards 2, 3, 8, 9, 11 and 12 use Twin Towers or Ball Movement, which were rebuilt in step 3d; they were re-solved with the new teams, as were the context runs that swapped in a rebuilt team.

Proposed card fixes, re-solved

Setup only (squares, arrows, matchups, teams, clock): never a rule. Each fix was re-solved at the full long budget (10 minutes, seed 0) and is compared with the card at the same budget.

Notes on the candidate cards

- **Need a Three:** the fix that works puts a real three-point defender on the best shooter: swapping X2 and X3 moves the Defensive SF (contest 6) onto O2 the sharpshooter, and the card becomes a Puzzle (24.0). A new defence team (Lockdown) also stops the Gift but leaves a Single trick.
- **Coach's Call (Single trick, no Wall at full budget):** a different defence team fixes it: Iron Wall (Puzzle 21.1, 5 plans) or Bucket Brigade (Puzzle 27.2, 2 plans).
- **In the Bonus:** now a Puzzle at full budget (29.0, P(30+) 0%, 18 plans); no longer borderline.
- **Star Locked:** the one plan is the locked star himself: O1 Quick Steps to H10 for an arc three (a locked player may still Quick Step, by the ruling that a lock means "can't Move or Sprint"). It changes with the matchup (Lockdown v Bucket Brigade: kick to the post; Twin Towers v Run and Gun: kick to the shooter). If the intended lesson is "someone else has to score", that is a ruling question (OPEN_QUESTIONS 51). Taking H10 away (X1 starts there) makes it a Puzzle (24.0, 3 plans).
- **No fix found** for Late Clock Reset, Sideline Out or Deny Everything: every setup change tried kept a Single trick. Deny Everything is a Single trick at 9.2 by design of the card (the defence denies everything); Sideline Out's one plan is the post entry, and denying it only lowered the value (15.2).

The context test

Plan-change rate: 35 of 39 (90%). That is how often the best opening plan changes when only the lineup changes (same squares and clock). A high rate is the goal.

Flagged plans (within 90% of the best in most matchups on most cards): **none**.

Dead rules

Across 179 best lines (every card, budget, seed, target and matchup):

- **Challenge Screen:** played 1 times; never among the defence's root options either (0). The offence's best lines use a Screen at all in 5 of 179.
- **Defensive Sprint closeouts:** 0 times.
- **Screen-heavy teams on the screen cards:** card 10: High-Low (0 screens, 0 challenges, value 25.1), Pace and Space (0 screens, 0 challenges, value 24.5), Twin Towers (0 screens, 0 challenges, value 24.0); card 12: Pace and Space (0 screens, 0 challenges, value 19.9), High-Low (1 screens, 0 challenges, value 24.0), Pace and Space (1 screens, 0 challenges, value 21.0); card 15: Pace and Space (0 screens, 0 challenges, value 29.8), Twin Towers (0 screens, 0 challenges, value 29.0).

Both are dead rules at this depth: no context makes either one best. That is a question for the designer (see OPEN_QUESTIONS), with the caveat that the search reaches two turns on most cards.

The Pause result

Defence steps in the principal lines (the 16 cards at 10 minutes): pause 10, move 4, intercept 3, steal 2, qs 2, none 1 (22 steps). **Pause is still the most-used defensive action in the principal lines (10 of 22).** But searched on its own, each of these defence positions has a Move that is clearly better than Pause (below). The Pause comes from where the defence's turn sits in the principal line: below the root, where the search tries only its concept plays (raw actions are added at the root only) and has little depth left. **So Pause is a search artefact, not a rule question**, and the same shallowness means card values (Gift verdicts above all) may favour the offence.

Card 6, Need a Three, after "O1 Pass to O4" (search depth 1): best X2 Move to C8 facing SW. Pause: 30.0. Best alternatives: X2 Move to C8 facing SW 26.0; X2 Move to B7 facing E 26.0; X2 Move to B7 facing SE 26.0; X2 Move to B7 facing S 26.0; worst X4 Move to B4 facing SW then X2 Move to D9 facing SW 39.0.

Card 5, Sideline, Late, after "O2 Pass to O3" (search depth 1): best X3 Move to B4 facing W. Pause: 27.2. Best alternatives: X3 Move to B4 facing W 15.0; X3 Move to D3 facing N 15.0; X3 Move to D3 facing NE 15.0; X3 Move to D3 facing E 15.0; worst X2 Move to A9 facing W then X3 Move to B7 facing NW 27.2.

Card 10, Late Clock Reset, after "O1 Sprint to L8" (search depth 1): best X4 Move to J6 facing E. Pause: 19.5. Best alternatives: X4 Move to J6 facing E 15.0; X4 Move to J6 facing SE 15.0; X4 Move to I4 facing E 15.0; X4 Move to I4 facing SE 15.0; worst X3 Move to M9 facing SW then X4 Move to J6 facing NE 26.0.

Coach's Call: the secret's value

Known target: the defence plays against the target it knows. Guessing: one defensive strategy for all five targets. The secret is worth the difference, measured at the same budget as everything else.

Limits of this run

- **Depth:** at 10 minutes most cards reach 2 turns (Coach's Call targets reach 4). The two-turn evaluation fills in the rest, so values are "what the offence can force over the next few turns".
- **Seeds change only tie-breaking;** the spread reflects budget, not chance.
- **Fixes are one run each** at the long budget; a fix that lands within 2 points of a verdict threshold is borderline, not a verdict.
